1/7 Hidden Maths Easter Egg! For most of the past 2300 years 'maths' = Euclid's of Alexandria. Alexandria was named after Alexander the Great and Greek was spoken throughout the Roman Empire at the time of Jesus. So, Ancient Greek and Latin were the churches' language of 'science'.

2/7 Early Christian bibles were written in Greek. Catholic Church is Roman. Roman Numerals promoted. No room for Sanskrit in science! Bharat loved ZERO and INFINITY. SACRILEGE! Only (western) God is infinite and zero (the void) is the realm of the devil. HINT Bharat = Devil.

3/7 ZERO must not be a 'void/shunya'. We will use it ONLY as a placeholder. Think! Bharat's 'opposite numbers' are called NEGATIVE numbers = bad! Brahmagupta wrote rules of positive, NEGATIVE and the VOID. Horror!

4/7 Bharat's brilliant maths ignored as culturally and politically inconvenient! Voltaire! "It is dangerous to be right in matters on which the established authorities are wrong." In England the Church controlled education. Mathematicians were usually Ministers e.g. John Wallis

5/7 NEGATIVE number were dismissed as ABSURD when they were simply directed magnitudes in an opposite direction to positive magnitudes or opposing quantities/forces as per laws of physics (Newton's 3rd Law). Bharat's mighty maths of zero and negatives NEVER got to us in 2020!

6/7 Maths F.E.A.R. = F.ALSE E.XPLANATIONS A.PPEARING R.EAL. Must update our foundations of maths! The good news is I've done that for you! (Hooray!)

7/7 Please email thoughts to feedback@podo.in I will summarise and share for @narendramodi and @ncert and @DrRPNishank **THANK YOU!**
